

Munken Print Cream

Our aim with Munken Print Cream was to develop the ultimate book paper by combining the best properties of woodfree and wood-containing paper. Thus we have created a quality with bulk, strength, surface, readability and printability especially for book production. The result is a high quality cream shaded book paper with a feel and stiffness suited to most types of books, for colour or black and white print. Munken Print Cream comes in a wide range of bulks and grammages in sheets and reels, enabling the same quality to be used for both covers and inserts. There is also a white version: see under Munken Print White. Munken Print Cream standard products are available as FSC™ and PEFC certified.
